PROFESSIONAL SUMMARY

Forward-thinking Software Engineer with background working productively in dynamic environments. Fluent in Java, C#, and C++ programming languages used to develop software. Communicates productively with both technical and non-technical personnel and clients. Proud team player focused on achieving project objectives with speed and accuracy.

SOFT SKILLS

- Software applications
- Database management software
- Solutions Deployment
- Operational Analysis
- Code Reviews
- Team Leadership
- System Development and Administration
- Project Management
- Technical Writing
- Technical analysis
- Workflows and queries
- Troubleshooting
- Customer relationship management

TECHNICAL SKILLS

Technologies

Java, C, C++, C#, Visual Basic, JavaScript, HTML, CSS, Python, R, React, React Native, ASP.net, Xamarin, Windows Forms, Tailwind CSS, Bootstrap, REST, Unity, Firebase, SQLite, MySQL, AWS, Linux

WORK HISTORY

Software Engineer II

11/2022 to PRESENT

JP Morgan Chase & Co. - (813) 881-2201

- Used C and Stratus OpenVOS to provide development to a payment processor system.
- Worked after hours occasionally for data validation that required knowledge of SQL, Splunk, and Stratus OpenVOS.
- Provided on-call development and release support with in-depth knowledge of code edits going into production.

Consultant Software Engineer

08/2021 to 11/2022

Wiley Edge - +44 (0) 207-870-4026

- Provided application development to JP Morgan Chase & Co. and quickly picked up a legacy tech stack.
- Used C and Stratus OpenVOS to make edits to a payment processor system.
- Worked after hours occasionally for data validation that required knowledge of SQL, Splunk, and Stratus OpenVOS.
- Shadowed individuals tasked with developer and release support.

Freelance Software Engineer

03/2021 to 08/2021

Self-Employed - (954)552-8141

- Learned technologies quickly to create applications that meet client's vision and expectations and used freelancing marketplaces like UpWork to find clients.
- Worked with frameworks including React, React Native, and Django.
- Developed full-stack applications.

Software Engineer 01/2020 to 03/2021

Tenex Software Solutions - (813) 618-3639

- Checked client code for bugs and weaknesses using approved troubleshooting methods.
- Fixed bugs for an online poll book application called Election Desk.
- Worked in Visual Studio ASP.net working with A MySQL and ASW database, a Visual Basic backend, and a JavaScript/HTML/CSS frontend.

Software Intern 10/2019 to 12/2019

Ideas Worth Coding - (954)552-8141 – Tampa, FL

- Designed a cross-platform mobile app called Swolemate to match gym users with other gym users, so they can be gym partners.
- Worked on a solo development team, building the Swolemate app in React Native, using Javascript with Firebase as a database.

Undergraduate Researcher 03/2019 to 12/2019

CARRT Lab USF - (813)974-2280 – Tampa, FL

- Built a wheelchair controllable by a brain-computer interface using a Unity simulation with C# script.
- Created an Arduino script in C++ to control a physical wheelchair, and used a bluetooth module to connect to the Unity simulation, so that users can control the physical wheelchair when they finish training.
- Developed top-level skills in collaboration, interpersonal communication and writing as result of hands-on work and training.

EDUCATION

Master of Science: Computer Science (Incomplete)

University of South Florida

08/2021 to 03/2022

Bachelor of Science: Computer Science

University of South Florida

08/2016 to 08/2020
