PROFESSIONAL SUMMARY

Software Engineer II with hands-on experience developing, testing, and maintaining financial technology systems across both modern and legacy tech stacks. Strong working knowledge of C, C#, and Java, with the ability to learn new languages, tech stacks, and systems quickly. Communicates effectively with technical and non-technical personnel and stakeholders. Quality-focused engineer with experience supporting production systems and developing highly resilient software, using Copilot and LLM-assisted workflows as productivity tools alongside established software engineering practices to strengthen code understanding, identify patterns, and resolve issues efficiently.

TECHNICAL SKILLS

Languages: Java, C, C#, JavaScript, Python, C++, HTML/CSS

Frameworks & Libraries: Spring Boot, React, React Native, ASP.NET, Django, Bootstrap, Tailwind CSS

Databases & Data Tools: SQL, MySQL, SQLite, Firebase, Splunk

Platforms & Systems: Stratus OpenVOS, Linux, AWS, Windows Forms, Xamarin

Tools & Practices: Git, REST APIs, SSH, SFTP, Agile/Scrum, SDLC, production support, release support, debugging, testing, code reviews, LLM-assisted workflows, GitHub Copilot

EXPERIENCE

Software Engineer II | JPMorgan Chase & Co. | Tampa, FL

Nov 2022 – Present

- Developed, tested, and maintained C-based payment-processing applications on Stratus OpenVOS for enterprise financial technology systems, completing an average of 8 story points per 2-week sprint.
- Validated monthly after-hours production releases using SQL, Splunk, and OpenVOS to confirm successful code installation and expected system behavior.
- Troubleshoot production issues during quarterly on-call rotations by researching system behavior, answering technical questions, and helping resolve defects.
- Implemented PCI 4.0 compliance updates in C-based payment-processing code to tokenize or mask payment card data, helping reduce plaintext card data exposure in legacy applications.
- Enhanced a Java/Spring Boot application using SSH and SFTP to connect with Stratus OpenVOS and support automated functional testing for interlinked payment engines.
- Applied GitHub Copilot and AI-assisted development tools to improve code comprehension, identify patterns, troubleshoot issues, and deliver solutions efficiently.

Consultant Software Engineer | Wiley Edge | Tampa, FL / Remote **Aug 2021 – Nov 2022**

- Completed an 8-week training program focused on C programming, Linux, and banking terminology.
- Joined JPMorgan Chase in Apr 2022 as a consultant software engineer contributing to development, testing, and production support for applications on Stratus OpenVOS.
- Converted from consultant placement to permanent JPMorgan Chase employment in Nov 2022.

Freelance Software Engineer | Self-Employed | Remote **Mar 2021 – Aug 2021**

- Built a telehealth portal in two months using React and Tailwind CSS based on a design outline provided by the client.
- Created an SMS-based quiz application in two months using React for user sign-up and JavaScript for server-side logic.
- Secured 2 freelance software development projects through Upwork, communicating directly with clients to clarify project expectations.

Software Engineer | Tenex Software Solutions | Tampa, FL **Jan 2020 – Mar 2021**

- Delivered full-stack development for Tenex polling software and POMS systems while completing an average of 4 work items per day.
- Implemented new features and resolved bugs in Election Desk, an online poll book application.
- Maintained application components across an ASP.NET environment with a MySQL database, Visual Basic backend, and JavaScript/HTML/CSS frontend.

ADDITIONAL TECHNICAL EXPERIENCE

Software Intern | Ideas Worth Coding | Tampa, FL **Oct 2019 – Dec 2019**

Undergraduate Researcher | CARRT Lab, USF | Tampa, FL **Mar 2019 – Dec 2019**

CERTIFICATIONS

AWS Certified Cloud Practitioner **Active through Mar 2029**

EDUCATION

University of South Florida | Tampa, FL
Bachelor of Science in Computer Science **Aug 2016 – Aug 2020**
